Assignment For Flutter Intern
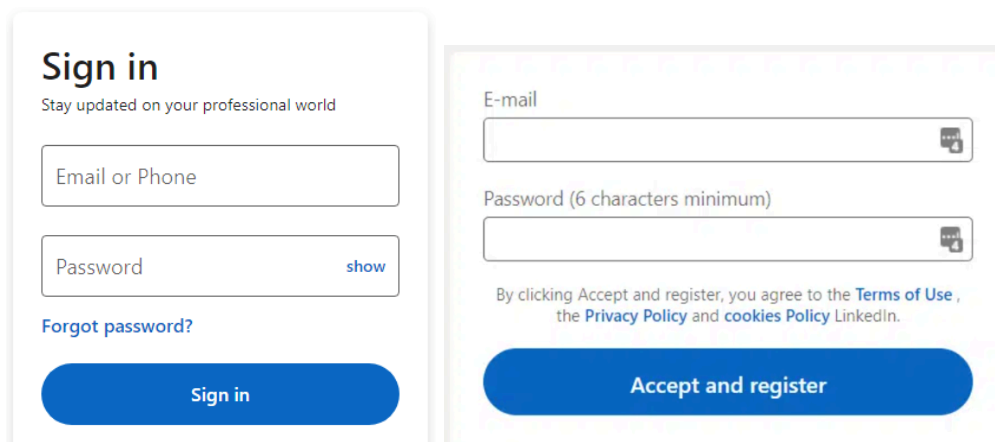

**<u>Assignment Task - Flutter Intern</u>**
Assignment period - 1 Week

Build a LinkedIn clone with dummy data.
Requirements:
1. Use MVVM architecture to build the application.
2. Build Signup & Login page with email-password authentication. (No need for social logins) When creating the sign-in, map the email and password fields into a model and use the model values inside the profile page.

3. Build homepage & profile page UIs only
   (Similar to linkedin) (No need to implement the functions)

4. Map all the dummy data to model classes and fetch it using those classes to the UI with the help of Provider.

Happy Coding!!
